FLOOR COVERING TOOLS

No. 333 Extension Wall Roller

This hand roller for vinyl includes three rubber rollers with just the right hardness to produce pressure on the vinyl without scratching and scuffing. The three rollers roll a 7 ½" wide section of vinyl on each pass. The axle and fasteners are recessed within the outer sections to allow the tool to work close to the wall. The raised aluminum handle has a large flat section for applying palm pressure. The twist-lock tube assembly adjusts handle length from 17" minimum to 27" maximum. Net weight: 3 lbs.
