

# Super Stop

## Non-Skid Pad

### Description & Documents

Grip-it® - SUPER STOP non-slip area rug pads provide added cushion for comfort, and are a great solution to help prevent area rugs from shifting, bunching, and sliding on hard surface flooring. Area rugs that shift and slide require constant repositioning, can lead to potentially dangerous slips and falls, and repetitive abrasion can cause damage to a floor surface. Super Stop's open-weave design provides excellent surface area coverage while maintaining air flow to make vacuuming easier. Super Stop is ready to use out of the package or easily trimmed to fit unique sizes and shapes with household scissors. Apply to a clean, dry, fully cured indoor flooring surface. Do not apply to lacquered, acrylic or porous surfaces. When choosing any type of rug pad, please always follow the flooring manufacturer's recommendation.

- Non-slip rug pad for area rugs on hard-surface floors
- Cushioned for added padding and comfort
- Helps hold rug in place to prevent bunching & slipping and protect floor surface
- Helps make homes safer
- Open weave construction allows air flow and makes vacuuming easier
- Designed for use under rugs of any kind and helps prevent premature wear
- Can be easily trimmed to fit with household scissors for any rug size/shape
- Made from polyester woven scrim coated with high-grade vinyl compound
- Washable: hand wash in a mild detergent, rinse, and air dry
- Guaranteed to hold non-slip properties for 10 years with proper maintenance
